

TEMPEST

Fighting for performance

DESIGNED FOR UNIQUE FIRE
GROUND VENTILATION SCENARIOS

SPECIAL OPERATIONS (SP) GAS POWER BLOWERS™

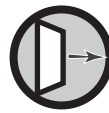

***ELECTRIC OPTION AVAILABLE**

The Tempest Special Operations Power Blower™, or SP for short, designed to tackle unique fire ground ventilation scenarios, the SP's specialized air pattern is highly effective when ventilating stairwells, complex, multistory and large structures (>5000ft²). This same air pattern is also designed to be deployed 9 to 11 feet from the entry point, providing additional access for personnel.

Extended Set Back

Most effective at a set back of 9 to 11 feet using Laminar Air Flow, all owing improved personnel access.

Laminar Air Flow

The Special Operations (SP) Power Blower™ used a uniquely designed grille and shroud to produce a narrow, high pressure air pattern.

Welded Steel Roll Cage Frame

Welds eliminate the need to continuously maintain/tighten nuts and bolts.

AirFlex Composition Impeller

Uniquely designed impellers deliver maximum air volume (CFM) from each Tempest Power Blower™.

Model Number	Part No.	Size	HP	CFM	Dimensions (W x D x H)	Weight
<i>Gasoline</i>						
SP-18-H-5.5	910-1620	18"	5.5	15792	20.5" x 21.5" x 22.5"	88 lbs.
